AP_TC_132	Advisor Portal → Dashboard	Verify the advisor Dashboard loads with all four summary stat tiles	Advisor is logged in and the Advisor Portal is selected.	1. Log in and select the Advisor Portal. 2. Land on the Dashboard page. 3. Observe the summary stat tiles.	Logged-in advisor account	The Dashboard heading is shown along with the Today's Sessions, Care Requests Pending, Total Members and Sessions Completed tiles.		Not Executed
AP_TC_133	Advisor Portal → Dashboard	Verify the advisor can hide and restore the Dashboard statistics row	Advisor is on the Dashboard with the stats row visible.	1. Click "Hide Stats". 2. Observe the statistics row. 3. Click the same control again to restore it.	N/A	The stats row collapses on Hide Stats and the control switches to Show Stats; clicking it again restores the tiles.		Not Executed
AP_TC_134	Advisor Portal → Dashboard	Verify the Recent Members "View all" link navigates to the Members page	Advisor is on the Dashboard and the Recent Members panel is displayed.	1. Locate the Recent Members panel. 2. Click "View all". 3. Observe the resulting page.	N/A	The advisor is taken to the Members page (/wellness/members) and the Members heading is displayed.		Not Executed
AP_TC_135	Advisor Portal → Dashboard	Verify the Schedule Session action is available from the Dashboard	Advisor is on the Dashboard.	1. Locate the "Schedule Session" button in the page header. 2. Click it. 3. Observe that a scheduling surface opens.	N/A	The Schedule Session control is enabled and opens a scheduling dialog or page without an application error.		Not Executed
AP_TC_136	Advisor Portal → Members	Verify the Members list loads with member records and all column headers	Advisor is logged in and at least one member is assigned.	1. Open Members from the sidebar. 2. Observe the column headers and the member rows.	Advisor account with assigned members	The Members heading is shown, the MEMBER, EMPLOYER, STATUS, UPCOMING SESSION and ACTIONS column headers are present, and at least one member row is listed.		Not Executed
AP_TC_137	Advisor Portal → Members	Verify searching by a valid member name filters the Members list	Advisor is on the Members page with more than one member listed.	1. Note the total number of member rows. 2. Read an existing member name from the first row. 3. Type that name into "Search by name or email...". 4. Observe the filtered list.	Search term: the first listed member's first name	The list narrows to rows matching the search term, at least one row remains, and the matching member is still displayed.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_138	Advisor Portal → Members	NEGATIVE - Verify searching for a member that does not exist returns no results	Advisor is on the Members page with members listed.	1. Confirm the list initially has member rows. 2. Type a string that cannot match any member into the search box. 3. Observe the list.	Search term: "zzzzz-no-such-member-9999"	All member rows are removed and an empty-state message is displayed, rather than an unfiltered list or an application error.		Not Executed
AP_TC_139	Advisor Portal → Members	Verify "Clear all" resets an applied search filter and restores the full list	Advisor is on the Members page with a search term applied.	1. Note the unfiltered row count. 2. Enter a search term that filters every row out. 3. Click "Clear all". 4. Observe the search box and the list.	Search term: "zzzzz-no-such-member-9999"	The search box is emptied and the member list is restored to its original row count.		Not Executed
AP_TC_140	Advisor Portal → Members	Verify the advisor can switch the Members view between Grid and List layouts	Advisor is on the Members page in the default List view.	1. Note the member row count in List view. 2. Click the "Grid" view toggle and observe the layout. 3. Click the "List" view toggle. 4. Observe the list is restored with the same records.	N/A	The records re-render as a card grid and back into a list, with the same number of members and no application error.		Not Executed
AP_TC_141	Advisor Portal → Sessions	Verify the Sessions page loads with the calendar and its navigation controls	Advisor is logged in to the Advisor Portal.	1. Open Sessions from the sidebar. 2. Observe the page heading and the calendar controls.	N/A	The Sessions heading is displayed together with the Previous, Today and Next controls and the Week / Month view switches.		Not Executed
AP_TC_142	Advisor Portal → Sessions	Verify the advisor can switch the sessions calendar between Week and Month views	Advisor is on the Sessions page.	1. Click the "Month" view control. 2. Observe the calendar. 3. Click the "Week" view control. 4. Observe the calendar returns to the weekly layout.	N/A	The calendar re-renders in each view without an application error and the Sessions page stays loaded.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_143	Advisor Portal → Sessions	Verify the advisor can collapse and restore the sessions calendar	Advisor is on the Sessions page with the calendar shown.	1. Click "Hide calendar". 2. Observe the calendar is collapsed and the control changes. 3. Click the control again to restore the calendar.	N/A	The calendar collapses and the control switches to "Show calendar"; clicking it again restores the calendar.		Not Executed
AP_TC_144	Advisor Portal → Sessions	NEGATIVE - Verify searching sessions for a value that cannot match returns no results	Advisor is on the Sessions page.	1. Type a string that cannot match any session into the sessions search box. 2. Observe the session list.	Search term: "zzzzz-no-such-session-9999"	No session rows are returned and the page shows an empty state rather than an application error.		Not Executed
AP_TC_170	Advisor Portal → Sessions	Verify the advisor can schedule a phone session for a member and then cancel it	Advisor is on the Sessions page. Member "Sadie Sink" (parthaaa06+emp_9@gmail.com) exists in this environment.	1. Click "Schedule Session". 2. In the "Book a session" dialog, choose the member, a session type and Phone as the meeting type (auto-fills the title and the member's phone number). 3. Submit "Schedule Session". 4. Confirm the new session appears in today's session list. 5. Cancel the session with a reason, to leave no test data behind.	Member: Sadie Sink; Session type: Wellness Check-in; Meeting type: Phone	The session is created and listed with a Scheduled status; after cancelling with a reason, the same row shows a Cancelled status and offers to reschedule.		Not Executed
AP_TC_171	Advisor Portal → Sessions	NEGATIVE - Verify "Schedule Session" stays disabled until the required booking fields are set	Advisor is on the Sessions page with the "Book a session" dialog open.	1. Click "Schedule Session" to open the booking dialog. 2. Without filling in any fields, observe the submit control.	N/A	The "Schedule Session" submit button remains disabled while member, session type, title and meeting link are still unset. No session is created.		Not Executed
AP_TC_145	Advisor Portal → Care Scheduler	Verify the Care Scheduler loads pending care requests with all column headers	Advisor is logged in and at least one care request exists.	1. Open Care Scheduler from the sidebar. 2. Observe the request list and its column headers.	N/A	The Care Scheduler heading is shown with the MEMBER, APPOINTMENT TYPE, STATUS and SUBMITTED column headers, and at least one request row is listed.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_146	Advisor Portal → Care Scheduler	Verify the advisor can open a care request via View Details	Advisor is on the Care Scheduler page with at least one request listed.	1. Locate a care request row. 2. Click "View Details" on that row. 3. Observe the request detail surface.	The first listed care request	The request detail opens as a dialog or detail page without an application error.		Not Executed
AP_TC_147	Advisor Portal → Care Scheduler	NEGATIVE - Verify searching care requests for an unknown member returns no results	Advisor is on the Care Scheduler page with requests listed.	1. Type a member name that does not exist into "Search by member name, email...". 2. Observe the request list.	Search term: "zzzzz-no-such-member-9999"	No care request rows are returned and the page shows an empty state rather than the unfiltered list.		Not Executed
AP_TC_148	Advisor Portal → Navigation Matrix	Verify the Navigation Matrix loads the screening condition catalogue	Advisor is logged in to the Advisor Portal.	1. Open Navigation Matrix from the sidebar. 2. Observe the listed screening conditions and the available filters.	N/A	The Navigation Matrix heading is displayed with screening conditions such as "Colorectal Cancer" and "Depression", plus the gender, priority and commonness filters.		Not Executed
AP_TC_149	Advisor Portal → Navigation Matrix	Verify searching the Navigation Matrix filters to the matching condition	Advisor is on the Navigation Matrix page with all conditions listed.	1. Type "Diabetes" into "Search navigation...". 2. Observe the filtered conditions.	Search term: "Diabetes"	The Diabetes (A1C) condition remains listed while unrelated conditions such as "Colorectal Cancer" are filtered out.		Not Executed
AP_TC_150	Advisor Portal → Navigation Matrix	Verify entering a patient age filters the matrix to age-appropriate screenings	Advisor is on the Navigation Matrix page.	1. Enter a valid age into "Enter age (e.g., 45)". 2. Observe the recommended screenings.	Age: 45	The matrix re-filters to screenings relevant to the entered age and remains usable, with no application error.		Not Executed
AP_TC_151	Advisor Portal → Navigation Matrix	NEGATIVE - Verify a non-numeric age is rejected by the age filter	Advisor is on the Navigation Matrix page.	1. Type letters into the "Enter age (e.g., 45)" field. 2. Observe the field value and the condition list.	Age: "abc"	The age field does not accept alphabetic input (it stays empty or shows a validation message) and the page does not crash.		Not Executed
AP_TC_152	Advisor Portal → Navigation Matrix	NEGATIVE - Verify searching the matrix for an unknown condition returns no results	Advisor is on the Navigation Matrix page.	1. Type a condition name that does not exist into the search box. 2. Observe the condition list.	Search term: "zzzzz-no-such-condition"	No screening conditions are listed and the page shows an empty state instead of the full catalogue.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_267	Advisor Portal → Navigation Matrix	Verify the gender filter shows sex-specific screenings only for the chosen gender	Advisor is on the Navigation Matrix with the full catalogue loaded.	1. Choose "Female" in "Filter by gender". 2. Observe the condition cards.	Gender: Female	Breast Cancer and Cervical Cancer cards remain, Prostate Cancer (PSA) is removed, and the card count drops.		Not Executed
AP_TC_268	Advisor Portal → Navigation Matrix	Verify the age filter hides screenings that do not apply at that age	Advisor is on the Navigation Matrix.	1. Enter age 30. 2. Observe the cards.	Age: 30	AAA (Aortic Aneurysm), which applies to men 65-75, is no longer listed; age-appropriate screenings remain.		Not Executed
AP_TC_269	Advisor Portal → Navigation Matrix	Verify the priority and commonness filters narrow the catalogue	Advisor is on the Navigation Matrix.	1. Choose a priority in "Filter by priority". 2. Note the count; Clear all. 3. Choose a commonness in "Filter by commonness".	First non-default option of each filter	Each filter reduces the number of cards and Clear all restores the full set.		Not Executed
AP_TC_270	Advisor Portal → Navigation Matrix	Verify the matrix can be switched between Grid and List views	Advisor is on the Navigation Matrix (Grid).	1. Click "List". 2. Click "Grid".	N/A	List view renders the conditions as a table; Grid restores the cards.		Not Executed
AP_TC_272	Advisor Portal → Navigation Matrix	Verify a condition card shows target population, age-based eligibility and clinical notes	Advisor is on the Navigation Matrix.	1. Read the first condition card.	N/A	The card shows Target population, Age-based eligibility bands (18–39, 40–49, 50–64, 65+) and Clinical notes, plus the eligibility legend.		Not Executed
AP_TC_157	Advisor Portal → Help & Support	Verify the Help & Support page loads contact details, knowledge base, live chat and FAQs	Advisor is logged in to the Advisor Portal.	1. Open Help & Support from the sidebar. 2. Observe the support sections and the FAQ list.	N/A	The Help & Support heading is shown with a Contact Support card (phone number, hours, support email), Knowledge Base and Live Chat cards (currently "Coming Soon") and a Frequently Asked Questions list.		Not Executed
AP_TC_158	Advisor Portal → Help & Support	Verify the support email is offered as a mailto link	Advisor is on the Help & Support page.	1. Locate the support email in the Contact Support card. 2. Inspect the link target.	N/A	The support email address is a "mailto:" link so it opens the advisor's mail client.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_159	Advisor Portal → Help & Support	Verify a knowledge base FAQ entry expands to reveal its answer	Advisor is on the Help & Support page with the FAQ list shown.	1. Click the first FAQ question. 2. Observe the answer content.	FAQ: "How do I schedule advisory sessions with members?"	The FAQ entry expands and reveals additional answer text without navigating away from the page.		Not Executed
AP_TC_160	Advisor Portal → Help & Support	NEGATIVE - Verify a support request cannot be submitted until category, title and a 20+ character description are provided	Advisor is logged in; the header "Support" button is available on every page.	1. Click "Support" in the page header. 2. Observe the submit control with the form empty. 3. Pick a category and a title but type a description shorter than 20 characters. 4. Observe the submit control.	Category: Feedback; Title: "Automated negative check"; Description: "too short"	"Submit Request" stays disabled while the form is incomplete; no ticket is created.		Not Executed
AP_TC_204	Advisor Portal → Help & Support	Verify the header Support modal offers Issue / Feedback / Feature Request categories, title, description and attachments	Advisor is logged in.	1. Click "Support" in the page header. 2. Observe the modal fields. 3. Close it with Cancel.	N/A	A Contact Support modal opens with the three category buttons, a Title (max 200), a Description (minimum 20 characters), an attachments drop zone (JPG/PNG/WebP/MP4/MO V, up to 5 files) and Cancel / Submit Request.		Not Executed
AP_TC_205	Advisor Portal → Help & Support	Verify a complete support request can be submitted from the header Support modal	Advisor is logged in.	1. Open the header Support modal. 2. Choose Feedback, enter a title and a 20+ character description. 3. Click "Submit Request".	Category: Feedback; Title: "Automated QA ticket"; Description: "Automated test submission from the QA suite - please ignore."	"Submit Request" becomes enabled once the form is valid and the modal closes after submission.		Not Executed
AP_TC_161	Advisor Portal → Reports	Verify the Reports page loads the advisor performance metrics	Advisor is logged in to the Advisor Portal.	1. Open Reports from the sidebar. 2. Observe the reported metrics.	N/A	The Reports & Analytics heading is displayed along with the Sessions Completed, Member Engagement and Goals Completed metrics.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_162	Advisor Portal → Reports	Verify the reporting period filter is available and can be changed	Advisor is on the Reports page with the default period applied.	1. Locate the reporting period control showing "Last 7 days". 2. Open the control. 3. Observe the available period options.	Default period: Last 7 days	The period control is displayed and opens a list of alternative reporting periods without an application error.		Not Executed
AP_TC_163	Advisor Portal → Reports	Verify "View all members" navigates from Reports to the Members page	Advisor is on the Reports page.	1. Click "View all members". 2. Observe the resulting page.	N/A	The advisor is taken to the Members page and the Members heading is displayed.		Not Executed
AP_TC_277	Advisor Portal → Reports	Verify changing the reporting period recalculates the metrics	Advisor is on the Reports page with the default "Last 7 days" period.	1. Read the Sessions Completed value. 2. Switch the period to "All time". 3. Read the value again.	Periods: Last 7 days, All time	The Sessions Completed value changes (All time is greater than or equal to the 7-day value).		Not Executed
AP_TC_278	Advisor Portal → Reports	Verify a metric tile drills down to the Sessions page	Advisor is on the Reports page.	1. Click the "Sessions Completed" tile. 2. Observe the resulting page.	N/A	The advisor is taken to /wellness/sessions.		Not Executed
AP_TC_279	Advisor Portal → Reports	Verify the report charts render (Goal Completion by Member, Sessions By Type, Goals by Category, Session Distribution by Day)	Advisor is on the Reports page.	1. Scroll through the report. 2. Observe each chart section.	N/A	All four chart sections are present with their titles.		Not Executed
AP_TC_280	Advisor Portal → Reports	Verify the Reports stats row can be hidden and restored	Advisor is on the Reports page.	1. Click "Hide Stats". 2. Click "Show Stats".	N/A	The metric tiles collapse and the control toggles to Show Stats; clicking again restores them.		Not Executed
AP_TC_164	Advisor Portal → Admin	Verify the Administration overview loads for an authorised advisor	Advisor account has administration access.	1. Open Admin from the sidebar. 2. Observe the administration overview.	N/A	The Administration heading is displayed together with the "Needs attention" panel and no access-denied message.		Not Executed
AP_TC_165	Advisor Portal → Admin	Verify the advisor can return from Administration to the main portal	Advisor is on the Administration overview page.	1. Click "Back to main page". 2. Observe the resulting page.	N/A	The advisor is returned to the main Advisor Portal area, out of the /admin routes.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_166	Advisor Portal → Access Control	NEGATIVE - Verify an unauthenticated user cannot reach the advisor Dashboard	No session exists in the browser (signed out / fresh browser).	1. Clear all session storage. 2. Navigate directly to /wellness/dashboard. 3. Observe the resulting page.	Route: /wellness/dashboard	The application redirects to the /login page and no advisor data is rendered.		Not Executed
AP_TC_167	Advisor Portal → Access Control	NEGATIVE - Verify an unauthenticated user cannot reach member records	No session exists in the browser.	1. Navigate directly to /wellness/members. 2. Observe the resulting page.	Route: /wellness/members	The application redirects to /login and no member records are displayed.		Not Executed
AP_TC_168	Advisor Portal → Access Control	NEGATIVE - Verify an unauthenticated user cannot reach the Administration area	No session exists in the browser.	1. Navigate directly to /wellness/admin/overview. 2. Observe the resulting page.	Route: /wellness/admin/overview	The application redirects to /login and the Administration overview is not rendered.		Not Executed
AP_TC_169	Advisor Portal → Access Control	NEGATIVE - Verify requesting an OTP for an unregistered email does not sign the user in	User is on the /login page and not signed in.	1. Select the Email sign-in tab. 2. Enter an email address that is not registered. 3. Click "Send One-Time Passcode". 4. Observe the result.	Email: "zzzzz-not-registered-9999@example.com"	The user is not signed in and no session token is issued - the app stays on the login/verify flow and never reaches the advisor portal.		Not Executed
AP_TC_172	Advisor Portal → Profile	Verify the advisor Profile page loads its overview and all information sections	Advisor is logged in to the Advisor Portal.	1. Open the profile from the avatar (or navigate to /wellness/profile). 2. Observe the Profile Overview and the information sections.	N/A	The Profile heading is shown with a Profile Overview (photo, email, experience, languages, Expertise Summary) and the Personal Information, Address Information, Professional Information, Languages Spoken, About and Expertise & Specialties sections, plus a "Back to workspace" control.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_173	Advisor Portal → Profile	Verify "Edit" on Personal Information opens an editable form with the identity fields locked	Advisor is on the Profile page.	1. Click "Edit" in the Personal Information section. 2. Observe the form fields. 3. Click Cancel.	N/A	First Name, Last Name, Date of Birth and Gender become editable; Email Address and Phone Number stay disabled; "Save Changes" is disabled until something changes; Cancel restores the read-only view.		Not Executed
AP_TC_174	Advisor Portal → Profile	Verify "Back to workspace" returns to the Advisor Portal dashboard	Advisor is on the Profile page.	1. Click "Back to workspace". 2. Observe the resulting page.	N/A	The advisor is returned to the workspace (Dashboard), out of /wellness/profile.		Not Executed
AP_TC_297	Advisor Portal → Profile	NEGATIVE - Verify a blank First Name is rejected in Personal Information	Advisor is on the Profile page.	1. Click "Edit" in Personal Information. 2. Clear the First Name field. 3. Observe the validation and the Save control.	First Name: (blank)	A "First name is required" message is shown and "Save Changes" stays disabled.		Not Executed
AP_TC_298	Advisor Portal → Profile	Verify Date of Birth and Gender can be saved and persist after reload	Advisor is on the Profile page.	1. Click "Edit" in Personal Information. 2. Enter a Date of Birth and pick a Gender. 3. Click "Save Changes". 4. Reload the page.	DOB: 05/06/1990; Gender: first option	An "Information updated" confirmation is shown and the saved values are displayed after reload.		Not Executed
AP_TC_299	Advisor Portal → Profile	Verify a profile photo (PNG) can be uploaded	Advisor is on the Profile page.	1. Click "Choose File" and pick a PNG under 3 MB. 2. Click "Upload Photo".	File: 1x1 PNG	"Upload Photo" enables after a file is chosen and the photo is uploaded; the overview shows the image.		Not Executed
AP_TC_301	Advisor Portal → Profile	Verify Address Information and Languages Spoken have editable forms	Advisor is on the Profile page.	1. Click "Edit" in Address Information; observe the form; Cancel. 2. Click "Edit" in Languages Spoken; observe; Cancel.	N/A	Address Information exposes editable Address Line 1/2, City, State, ZIP Code and Country; Languages Spoken opens an editor; both close on Cancel.		Not Executed
AP_TC_302	Advisor Portal → Profile	Verify Professional Information can be edited and saved	Advisor is on the Profile page.	1. Click "Edit" in Professional Information. 2. Set Years of Experience. 3. Click "Save Changes".	Years of Experience: 4	The value is saved and shown in the read-only view.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_303	Advisor Portal → Profile	Verify the Expertise Summary lists the matching dimensions used by the Navigation Matrix	Advisor is on the Profile page.	1. Locate the Expertise Summary in the Profile Overview.	N/A	Location Expertise, Health Conditions, Cultural Expertise and Age Groups are listed.		Not Executed
AP_TC_175	Advisor Portal → Notifications	Verify the Notification Settings page loads with delivery preferences	Advisor is logged in to the Advisor Portal.	1. Navigate to /wellness/notifications. 2. Observe the notification settings.	N/A	The Notification Settings heading is shown together with the "Notification Delivery Tips" guidance, without an application error.		Not Executed
AP_TC_176	Advisor Portal → Care Scheduler	Verify the Confirmed Appointments view loads	Advisor is on Care Scheduler → Confirmed Appointments.	1. Open Care Scheduler, then Confirmed Appointments. 2. Observe the confirmed appointments list or its empty state.	N/A	The "Confirmed Appointments" heading and an "Upcoming Appointments" count are shown, with either appointment rows or a "No Confirmed Appointments" empty state - not an error.		Not Executed
AP_TC_177	Advisor Portal → Care Scheduler	Verify "View member requests" returns to the Care Scheduler queue	Advisor is on Care Scheduler → Confirmed Appointments.	1. Click "View member requests". 2. Observe the resulting page.	N/A	The advisor is taken back to the Care Scheduler request queue.		Not Executed
AP_TC_178	Advisor Portal → Admin	Verify Admin → Advisors loads the advisor roster with column headers	Advisor has administration access.	1. Open Admin, then the Advisors tab. 2. Observe the advisor list and its column headers.	N/A	The ADVISOR, EMAIL, SPECIALTY, LOCATION and ASSIGNED MEMBERS column headers are shown with at least one advisor row and a "View" action per row.		Not Executed
AP_TC_179	Advisor Portal → Admin	Verify searching Admin → Advisors for an unknown name returns no results	Advisor is on Admin → Advisors with advisors listed.	1. Type a name that does not exist into "Search by name or email...". 2. Observe the advisor list.	Search term: "zzzzz-no-such-advisor-9999"	No advisor rows are returned and the page shows an empty state rather than the unfiltered roster.		Not Executed
AP_TC_180	Advisor Portal → Admin	Verify opening an advisor from the roster reaches their detail view	Advisor is on Admin → Advisors with advisors listed.	1. Click "View" on the first advisor row. 2. Observe the resulting page.	The first listed advisor	The advisor detail view opens, showing that advisor's name as a heading.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_181	Advisor Portal → Admin	Verify Admin → Members loads the member roster with column headers	Advisor has administration access.	1. Open Admin, then the Members tab. 2. Observe the member list and its column headers.	N/A	The MEMBER, EMAIL, LOCATION, EMPLOYER, RISK and WAITING column headers are shown with at least one member row.		Not Executed
AP_TC_182	Advisor Portal → Admin	NEGATIVE - Verify searching Admin → Members for an unknown name returns no results	Advisor is on Admin → Members with members listed.	1. Type a name that does not exist into "Search by name or email...". 2. Observe the member list.	Search term: "zzzzz-no-such-member-9999"	No member rows are returned rather than the unfiltered roster.		Not Executed
AP_TC_183	Advisor Portal → Admin	Verify Admin → Departures loads with its status filter tabs	Advisor has administration access.	1. Open Admin, then the Departures tab. 2. Observe the status filter tabs.	N/A	The Departures heading is shown with the All open, Not started, In progress, With Command Center, Closed and Departed filter tabs, without an application error.		Not Executed
AP_TC_184	Advisor Portal → Admin	Verify Admin → Assessment Audit loads with search and export controls	Advisor has administration access.	1. Open Admin, then the Assessment Audit tab. 2. Observe the page controls.	N/A	The Assessment Audit heading is shown with a member/advisor/assessment search box and an "Export CSV" control.		Not Executed
AP_TC_185	Advisor Portal → Admin	Verify Admin → Follow-ups loads with its column headers	Advisor has administration access.	1. Open Admin, then the Follow-ups tab. 2. Observe the follow-up list and its column headers.	N/A	The MEMBER, FLAG, NEXT STEP, EMPLOYER, ADVISOR and DAYS STUCK column headers are shown with at least one row.		Not Executed
AP_TC_186	Advisor Portal → Admin	Verify Admin → Advisor notifications loads the Scheduler / Engine / Delivery panels	Advisor has administration access.	1. Open Admin, then the Advisor notifications tab. 2. Observe the panels shown.	N/A	The "Advisor notifications" heading is shown together with Scheduler, Engine and Delivery sections, without an application error.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_187	Advisor Portal → Admin → Advisor Detail	Verify the advisor detail view loads with its section navigation	Advisor has administration access and opened an advisor from the roster.	1. Open Admin → Advisors and click "View" on an advisor. 2. Observe the advisor detail sections.	The first listed advisor	The advisor's name is shown as a heading together with Profile, Assigned members (Caseload), Workload and Lifecycle section links, and a "Back to Advisors" control.		Not Executed
AP_TC_188	Advisor Portal → Admin → Advisor Detail	Verify the Workload tab shows capacity and load metrics	Advisor is on an advisor's detail view.	1. Click the "Workload" section link. 2. Observe the workload metrics.	N/A	The advisor's Assigned members, Sessions this week and Employer groups metrics are shown, without an application error.		Not Executed
AP_TC_189	Advisor Portal → Admin → Advisor Detail	Verify the Lifecycle tab shows availability status and case metrics	Advisor is on an advisor's detail view.	1. Click the "Lifecycle" section link. 2. Observe the availability status and case metrics.	N/A	The advisor's availability status and Members / Upcoming Sessions / Open Care Requests / Assessments In Progress metrics are shown.		Not Executed
AP_TC_190	Advisor Portal → Admin → Advisor Detail	Verify "Back to Advisors" returns to the Admin advisor roster	Advisor is on an advisor's detail view.	1. Click "Back to Advisors". 2. Observe the resulting page.	N/A	The advisor is returned to the Admin → Advisors roster.		Not Executed
AP_TC_191	Advisor Portal → Sessions → Clinical Workflow	Verify the Health Assessment workflow screen loads for a started session	Advisor is on the Sessions page. Member "Tom Jerry" (parthaaa06+emp_7@gmail.com) has no Health Assessment already on record today.	1. Schedule a Health Assessment session for the member and start it. 2. Open the Assessment action. 3. Observe the resulting screen. Do not enter or submit any data.	Member: Tom Jerry; Session type: Health Assessment; Meeting type: Phone	The Health Assessment screen loads at /wellness/sessions/:id/health-assessment with its Demographics & Physical section, without an application error.		Not Executed
AP_TC_192	Advisor Portal → Sessions → Clinical Workflow	Verify the Pre Visit Session planning screen loads for a started session	Advisor is on the Sessions page. Click "Preview" on a document.	N/A	A preview opens (dialog or viewer) without an application error.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_228	Advisor Portal → Members → Member Profile	Verify Chat History lists on-demand conversations and opens a transcript	Advisor is on the profile of a member with chat history.	1. Open Chat History. 2. Click a conversation entry.	Member: Anthony Stark	Conversations are listed with date, status and duration; clicking one shows its transcript.		Not Executed
AP_TC_229	Advisor Portal → Members → Member Profile	Verify Call History loads (calls or "No call history" empty state)	Advisor is on the member profile.	1. Open Call History.	N/A	The Call History heading is shown with either call entries or the "No call history" empty state.		Not Executed
AP_TC_230	Advisor Portal → Members → Member Profile	Verify Advisor History shows the current advisor and previous assignments	Advisor is on the member profile.	1. Open Advisor History.	N/A	The current advisor is marked "Current" with the assignment period; previous advisors (if any) list their period and reason.		Not Executed
AP_TC_231	Advisor Portal → Sessions	Verify the session status filter lists all statuses and filters the list	Advisor is on the Sessions page.	1. Open the "All Statuses" dropdown. 2. Observe the options. 3. Choose "Completed".	Statuses: Scheduled, In Progress, Completed, Cancelled, Skipped	All five statuses are offered and the list re-renders without an application error.		Not Executed
AP_TC_232	Advisor Portal → Sessions	Verify the session type filter lists the five session types	Advisor is on the Sessions page.	1. Open the "All Session Types" dropdown. 2. Observe the options. 3. Choose "Health Assessment".	Types: Health Assessment, Pre Visit Session, Post-Visit Session, Wellness Check-in, Annual Road Map	All five types are offered and the list re-renders without an application error.		Not Executed
AP_TC_233	Advisor Portal → Sessions	Verify the calendar Previous / Next / Today controls move the displayed month	Advisor is on the Sessions page in Month view.	1. Switch to Month view and note the month label. 2. Click Previous. 3. Click Next twice. 4. Click Today.	N/A	Previous shows the prior month, Next moves forward, and Today returns to the current month.		Not Executed
AP_TC_234	Advisor Portal → Sessions	Verify selecting a day in Month view lists that day's sessions with counts	Advisor is on the Sessions page; at least one past day has sessions.	1. Switch to Month view. 2. Click a day whose button shows "— N sessions". 3. Observe the Selected Day panel and the list.	Any day with sessions in the current or previous month	The Selected Day panel shows that date with Sessions / Virtual / Phone counts and the list shows rows for it.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_235	Advisor Portal → Sessions	NEGATIVE - Verify past dates and Sundays cannot be chosen in the booking calendar	Advisor has the "Book a session" dialog open.	1. Click "Schedule Session". 2. Inspect the date buttons for days before today and for Sundays.	Current month	Days before today are disabled; Sundays are disabled and labelled "Sunday, unavailable"; today is pre-selected.		Not Executed
AP_TC_236	Advisor Portal → Sessions	Verify the booking form auto-fills the title and computes a 45-minute duration	Advisor has the "Book a session" dialog open.	1. Choose a member and a session type. 2. Observe the Session title and Duration. 3. Observe the "Still needed" status as fields are filled.	Member: first test member; Type: Health Assessment	The title becomes "<Member> – <Type>", Duration reads "45 minutes" (auto), and the status text lists only the remaining required fields.		Not Executed
AP_TC_237	Advisor Portal → Sessions	Verify "Generate Zoom link" creates a meeting link for a Virtual session	Advisor has the "Book a session" dialog open with a member and type chosen.	1. Keep Meeting type = Virtual. 2. Click "Generate Zoom link". 3. Observe the Meeting link field and the Copy control.	Meeting type: Virtual	A zoom.us join URL is filled in, Copy becomes enabled and the "Still needed" status no longer lists the meeting link. No session is created.		Not Executed
AP_TC_238	Advisor Portal → Sessions	NEGATIVE - Verify a member cannot be booked for the same session type twice on one day	A test member already has a session of some type today (created by this test if needed).	1. Book a Phone session for a member. 2. Open "Book a session" again for the same member. 3. Open the Session type list.	Type: first free type for the member	The type just booked is disabled in the list for that member (or the app rejects the duplicate with a "Could not schedule" message).		Not Executed
AP_TC_245	Advisor Portal → Sessions	Verify the session list paginates (rows per page + page controls)	Advisor is on the Sessions page.	1. Select a day with sessions (or today). 2. Observe the pagination footer.	N/A	A "Rows per page" selector and "Showing x–y of n sessions" text with Previous/Next page controls are shown.		Not Executed
AP_TC_239	Advisor Portal → Sessions	NEGATIVE - Verify a session cannot be cancelled without a reason	A Scheduled test session exists (created by this test).	1. Book a Phone session. 2. Click Cancel on its row. 3. Leave Reason blank and observe "Cancel Session". 4. Enter a reason and confirm.	Reason: (blank) then "AP_TC_239 cleanup"	Reason is marked required and "Cancel Session" is disabled while it is blank; with a reason the session is cancelled.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_240	Advisor Portal → Sessions	Verify a cancelled session can be rescheduled to another day	A Cancelled test session exists (created by this test).	1. Book a Phone session and cancel it with a reason. 2. Click "Reschedule" on the Cancelled row. 3. In "Edit session" pick the next available day. 4. Click "Save changes".	Type: Wellness Check-in; new date: next enabled day	"Edit session" opens with the member locked and the session type pre-filled; after saving, the session is listed as "Rescheduled" on the new day.		Not Executed
AP_TC_241	Advisor Portal → Sessions	Verify Start moves a session to "Waiting for member" and "Member Joined" moves it to In progress	A Scheduled test session exists (created by this test). Started sessions cannot be cancelled - this leaves one in-progress session behind.	1. Book a Phone session. 2. Click "Start" on the row and confirm "Start session". 3. Observe the row status and pipeline. 4. Click "Member Joined".	Type: Post-Visit Session	The row shows "Waiting for member" with Member Joined / Assessment actions; Member Joined opens the assessment and the status becomes In progress.		Not Executed
AP_TC_242	Advisor Portal → Sessions	Verify "End Meeting" moves an in-progress session to "Wrapping up" and the header shows the active-session banner	An in-progress test session exists (AP_TC_241 or created here).	1. Open the in-progress session's Assessment. 2. Observe the header banner. 3. Click "End Meeting". 4. Return to Sessions and observe the row.	N/A	The header shows an "IN PROGRESS ... Go to session" banner; End Meeting sets the row to "Wrapping up" with the Assessment action still available.		Not Executed
AP_TC_244	Advisor Portal → Sessions	Verify a completed session offers Assessment and Share, and Share marks the summary as sent	A Completed session exists for the advisor.	1. Filter the list to Completed (or pick a past day). 2. Observe the row actions. 3. Click "Share".	Any completed session	The row shows Assessment and Share; after Share the pipeline shows "Summary Sent" / the summary is recorded as shared.		Not Executed

AP_TC_246	Advisor Portal → Sessions → Clinical Workflow	Verify the Health Assessment workflow can be completed end to end (6 steps)	Advisor is logged in; a test member has no session of this type today.	1. Schedule a Health Assessment (Phone) for a test member and start it; click Member Joined. 2. Step 1 Demographics & Physical: enter height/weight (BMI is validated) and Confirm & continue. 3. Steps 2-5: Employment & Literacy, Lifestyle Habits, Dietary & Behavioral Health, Health Assessment - fill and Confirm & continue. 4. Step 6 Assessment Review: click "Complete assessment". 5. Confirm the session shows as Completed in the list.	Session type: Health Assessment; realistic values for every required field	Every step saves and advances (Demographics & Physical → Employment & Literacy → Lifestyle Habits → Dietary & Behavioral Health → Health Assessment → Assessment Review), the completion button closes the workflow and the session row shows Completed with Assessment and Share actions.		Not Executed
AP_TC_250	Advisor Portal → Sessions → Clinical Workflow	Verify the Post-Visit Session workflow can be completed end to end (5 steps)	Advisor is logged in; a test member has no session of this type today.	1. Schedule a Post-Visit Session (Phone) for a test member and start it; click Member Joined. 2. Step 1 Screening Planning & Notes: record each screening and Save & Continue. 3. Step 2 Health Risk Assessment Outcomes: record outcomes and Save & Continue. 4. Step 3 Doctor Questions - Outcomes and Step 4 Visit Priorities - Achievement Status: Save & Continue. 5. Step 5 Visit Summary: click "Complete Session". 6. Confirm the session shows as Completed in the list.	Session type: Post-Visit Session; realistic values for every required field	Every step saves and advances (Screening Planning & Notes → Health Risk Assessment Outcomes → Doctor Questions - Outcomes → Visit Priorities - Achievement Status → Visit Summary), the completion button closes the workflow and the session row shows Completed with Assessment and Share actions.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_251	Advisor Portal → Sessions → Clinical Workflow	Verify the Wellness Check-in workflow can be completed end to end (4 steps)	Advisor is logged in; a test member has no session of this type today.	1. Schedule a Wellness Check-in (Phone) for a test member and start it; click Member Joined. 2. Step 1 Wellness Progress & Feedback, Step 2 Barriers & Challenges, Step 3 Next Steps & Actions: fill and Save & Continue. 3. Step 4 Session Summary: click "Complete Session". 4. Confirm the session shows as Completed in the list.	Session type: Wellness Check-in; realistic values for every required field	Every step saves and advances (Wellness Progress & Feedback → Barriers & Challenges → Next Steps & Actions → Session Summary), the completion button closes the workflow and the session row shows Completed with Assessment and Share actions.		Not Executed
AP_TC_252	Advisor Portal → Sessions → Clinical Workflow	Verify the Annual Road Map workflow can be completed end to end (5 steps)	Advisor is logged in; a test member has no session of this type today.	1. Schedule a Annual Road Map (Phone) for a test member and start it; click Member Joined. 2. Step 1 Health Profile Comparison: enter current metrics and Save & Continue. 3. Step 2 Preventive Care Completion and Step 3 Wellness Goal Achievement: Save & Continue. 4. Step 4 Member Feedback & Experience: rate each 1-10 scale and Save & Continue. 5. Step 5 Summary: click "Complete Session". 6. Confirm the session shows as Completed in the list.	Session type: Annual Road Map; realistic values for every required field	Every step saves and advances (Health Profile Comparison → Preventive Care Completion → Wellness Goal Achievement → Member Feedback & Experience → Summary), the completion button closes the workflow and the session row shows Completed with Assessment and Share actions.		Not Executed

AP_TC_248	Advisor Portal → Sessions → Clinical Workflow	Verify Pre Visit Session step 1 (Screening Planning) saves and step 2 (Health Risk Assessment) requires every risk item to be recorded	Advisor is logged in; a test member has no Pre Visit Session today.	1. Schedule and start a Pre Visit Session; click Member Joined. 2. Step 1: observe Critical / Advised / Optional groups and the screening cards; click Confirm & continue. 3. Step 2: observe the four risk categories with three items each; open an item. 4. Observe "Confirm & continue" before all items are recorded.	Session type: Pre Visit Session	Step 1 saves (screening step marked reviewed) and step 2 lists Cardiovascular Health, Metabolic & Diabetes Risk, Men's/Women's Health Concerns and Mental Health & Wellbeing; each item needs a Risk level and Notes; "Confirm & continue" stays disabled until every item is saved, skipped or removed.		Not Executed
AP_TC_247	Advisor Portal → Sessions → Clinical Workflow	NEGATIVE - Verify the Health Assessment rejects implausible physical measurements (BMI check)	An in-progress Health Assessment is open (created by this test).	1. Schedule and start a Health Assessment; click Member Joined. 2. Enter height 6 ft 6 in and weight 60 lbs. 3. Click "Confirm & continue".	Height: 6'6"; Weight: 60 lbs (BMI ≈ 6.9)	A BMI warning ("extremely low... verify the values") is shown and the step does not advance.		Not Executed
AP_TC_253	Advisor Portal → Sessions → Clinical Workflow	Verify an in-progress workflow retains saved data when reopened	An in-progress Health Assessment with step 1 saved exists (created by this test).	1. Schedule and start a Health Assessment; click Member Joined. 2. Enter 5 ft 8 in / 170 lbs and Confirm & continue. 3. Return to Sessions and open the Assessment again. 4. Observe step 1 values.	Height 5'8", Weight 170 lbs	The saved measurements are shown again (the workflow reopens on step 1 - progress position is not remembered, data is).		Not Executed
AP_TC_254	Advisor Portal → Sessions → Clinical Workflow	Verify workflow journey steps are gated sequentially and the Member info panel collapses	An in-progress Post-Visit Session is open (created by this test).	1. Schedule and start a Post-Visit Session; click Member Joined. 2. Observe the Journey progress steps. 3. Click "Collapse Member info".	N/A	Steps 02-05 are disabled until step 01 is saved; History and End Meeting are available; the Member info panel collapses.		Not Executed
AP_TC_256	Advisor Portal → Care Scheduler	Verify the Care Scheduler stat tiles (Total requests, In progress, Closed) are shown	Advisor is on the Care Scheduler page.	1. Observe the tiles above the request list.	N/A	Total requests, In progress and Closed tiles are shown with counts.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_257	Advisor Portal → Care Scheduler	Verify the request status filter offers every request status and narrows the list	Advisor is on the Care Scheduler page with requests listed.	1. Open "Filter by status". 2. Observe the options. 3. Choose "Completed".	Statuses: Pending, In Progress, Completed, Unreported, Cancelled	The status options are listed (each once) and applying one leaves only rows with that status.		Not Executed
AP_TC_258	Advisor Portal → Care Scheduler	Verify the employer filter narrows the request list	Advisor is on the Care Scheduler page with requests listed.	1. Click "Filter by employer..." and pick an employer. 2. Observe the list. 3. Click "Clear all".	First employer in the list	Only that employer's requests remain; Clear all restores the full list.		Not Executed
AP_TC_259	Advisor Portal → Care Scheduler	Verify the request list can be sorted by Submitted date	Advisor is on the Care Scheduler page with at least two requests.	1. Click "Sort by Submitted" twice. 2. Compare the first row each time.	N/A	The order of the rows changes between ascending and descending.		Not Executed
AP_TC_260	Advisor Portal → Care Scheduler	Verify request list pagination (rows per page and page controls)	Advisor is on the Care Scheduler page.	1. Observe the pagination footer. 2. Open "Rows per page".	N/A	"Showing x-y of n requests", Previous/Next page controls and a Rows per page selector are shown.		Not Executed
AP_TC_261	Advisor Portal → Care Scheduler	Verify searching by Request ID finds the request	Advisor is on the Care Scheduler page with requests listed.	1. Read a Request ID from the list. 2. Type it into the search box.	First listed REQ-... id	Exactly that request remains listed.		Not Executed
AP_TC_262	Advisor Portal → Care Scheduler	Verify the request details page shows the member panel, request facts, slot preferences and an advisor note	Advisor is on the Care Scheduler page with at least one request.	1. Click "View Details" on a request. 2. Observe the page.	First listed request	A details page (/care-scheduler/requests/:id) shows the member's contact and location (read-only), Request ID, appointment type, preferred provider, submitted date, Primary/Secondary slot preferences and an Advisor note field, plus "Back to Requests".		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_263	Advisor Portal → Care Scheduler	Verify the review checklist gates "Mark as Reviewed" until every item is confirmed	A Pending request exists.	1. Open a Pending request. 2. Observe "Mark as Reviewed" with nothing checked. 3. Click "Select All". 4. Observe the control.	First Pending request	"Mark as Reviewed" is disabled until Member need, Contact details, Location and Preferred times are all confirmed; Select All enables it.		Not Executed
AP_TC_264	Advisor Portal → Care Scheduler	Verify "Mark as Reviewed" moves a Pending request to In Progress and opens the provider-call step	A Pending request exists (this test changes its status).	1. Open a Pending request. 2. Click "Select All" then "Mark as Reviewed". 3. Observe the next step and the queue status.	First Pending request	The page advances to "Call the provider & check availability" with per-slot Confirmed / Not Available controls, and the queue shows the request as In Progress.		Not Executed
AP_TC_265	Advisor Portal → Care Scheduler	Verify the provider-call step records slot outcomes and gates Continue until a slot is confirmed	An In Progress request exists.	1. Filter to In Progress and open a request. 2. Observe the provider card and slot controls. 3. Observe "Continue".	First In Progress request	The provider name/phone/address are shown; each preferred slot has Confirmed / Not Available; "Still needed: a slot the provider can confirm" is shown and Continue is disabled until then; Close request is available.		Not Executed
AP_TC_266	Advisor Portal → Care Scheduler	Verify the Confirmed Appointments view shows the upcoming count and the list or empty state	Advisor is logged in.	1. Open /wellness/care-scheduler/confirmed.	N/A	"Upcoming Appointments (n)" is shown with either appointment rows or "No Confirmed Appointments".		Not Executed
AP_TC_281	Advisor Portal → Admin	Verify the advisor roster filters (specialty, capacity, status), positive search and Grid view	Advisor has administration access; advisors exist.	1. Open each filter and observe its options. 2. Search for an existing advisor by name. 3. Apply a status filter. 4. Switch to Grid.	Search: the first listed advisor's name	Specialty, capacity (No members / Carrying members) and status (Active / Pending / On leave / Paused / Departed) filters are offered; the search narrows to the advisor; Grid renders cards with View actions.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_282	Advisor Portal → Admin → Advisor Detail	Verify the Profile tab shows the advisor's details	Advisor has administration access and opened an advisor.	1. Observe the Profile tab (default).	First listed advisor	The advisor's name heading, contact details and section links (Profile, Assigned members, Workload, Lifecycle) are shown.		Not Executed
AP_TC_283	Advisor Portal → Admin → Advisor Detail	Verify the Caseload tab lists assigned members and offers the "Assign members" wizard	Advisor has administration access and opened an advisor.	1. Click "Assigned members". 2. Observe the table and the "Assign members" action. 3. Click "Assign members"; observe; Cancel.	N/A	The caseload table (Member, Employer, Location, Progress) and search/List/Grid controls are shown; "Assign members" opens a wizard whose destination is this advisor ("Pick members from the unassigned pool").		Not Executed
AP_TC_284	Advisor Portal → Admin → Advisor Detail	Verify "Set availability" on the Lifecycle tab offers On leave / Paused (cancelled without saving)	Advisor is on an advisor's Lifecycle tab.	1. Click "Lifecycle". 2. Click "Set availability". 3. Observe the options. 4. Cancel.	N/A	A "Set availability" dialog explains the current status and offers On leave and Paused; Cancel closes it without changing the status.		Not Executed
AP_TC_285	Advisor Portal → Admin → Advisor Detail	NEGATIVE - Verify "Off board" requires a reason before a departure can be started (cancelled without saving)	Advisor is on an advisor's Lifecycle tab.	1. Click "Off board". 2. Observe the dialog with no reason chosen. 3. Cancel.	N/A	An "Off-board <advisor>?" dialog explains that members must be handed over; the primary action stays disabled until a reason is chosen; Cancel closes it and no departure is created.		Not Executed
AP_TC_286	Advisor Portal → Admin	Verify Admin → Members shows assignment stats and the Pending / Assigned tabs	Advisor has administration access.	1. Observe the stat tiles. 2. Click the "Assigned" tab. 3. Click the "Pending" tab.	N/A	Total Members, Pending Assignment, Assigned and Longest Wait tiles are shown; the Pending tab lists unassigned members with an Assign action and the Assigned tab lists members with their advisor.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_287	Advisor Portal → Admin	Verify the employer, risk and account-status filters on Admin → Members	Advisor has administration access.	1. Open each filter and observe its options. 2. Apply a risk filter.	Risk: first option	Employer, Risk (Critical / High / Moderate / Low / Unknown) and Account status (Active / Pending activation) filters are offered and applying one re-renders the list without an error.		Not Executed
AP_TC_288	Advisor Portal → Admin	Verify "Assign" opens the advisor-choice wizard with a confirmation step (cancelled before confirming)	At least one pending member exists.	1. Click "Assign" on a pending member. 2. Search and select an advisor. 3. Click "Assign 1 member". 4. Observe the confirmation; click Cancel.	Advisor: first advisor in the list	Step 2 of the wizard lists advisors with radio selection and filters; "Assign 1 member" is disabled until an advisor is chosen; clicking it asks "Assign this member?" with Cancel / Yes, assign.		Not Executed
AP_TC_289	Advisor Portal → Admin	Verify selecting members with the checkboxes switches to bulk assignment	At least one pending member exists.	1. Tick the checkbox on a pending member row. 2. Observe the per-row Assign action.	N/A	With rows selected, the per-row Assign buttons are disabled in favour of the bulk action, and "Select all on this page" is available.		Not Executed
AP_TC_290	Advisor Portal → Admin	Verify an assigned member's Actions menu offers View history and Reassign, and View history shows the assignment history	At least one assigned member exists.	1. Open the "Assigned" tab. 2. Click "Actions for <member>". 3. Click "View history".	First assigned member	The menu offers "View history" and "Reassign"; View history lists the current advisor (marked Current) and any previous advisors with their periods.		Not Executed
AP_TC_291	Advisor Portal → Admin	Verify a pending member can be assigned and then reassigned to another advisor (write path)	ADMIN_WRITE_TESTS = 1; at least one pending member and two advisors exist. Leaves the member assigned to the second advisor.	1. Assign the last pending member to the first advisor and confirm. 2. On the Assigned tab, open Actions → Reassign for that member. 3. Choose a different advisor, click "Reassign member" and confirm.	Member: last pending member; advisors: first two in the roster	After "Yes, assign" the member appears on the Assigned tab under the first advisor; after "Yes, reassign" the row shows the second advisor.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_292	Advisor Portal → Admin	Verify the Departures status tabs filter the list	Advisor has administration access.	1. Open Admin → Departures. 2. Click each tab in turn.	Tabs: All open, Not started, In progress, With Command Center, Closed, Departed	Each tab re-renders the list (rows or "No departures") without an error and the clicked tab is marked pressed.		Not Executed
AP_TC_293	Advisor Portal → Admin	Verify Assessment Audit search/filters work and "Export CSV" downloads a CSV file	Advisor has administration access.	1. Open Admin → Assessment Audit Log. 2. Observe the time / advisor / member / assessment filters. 3. Click "Export CSV".	N/A	The audit table (Member, Changes, Assessments, Advisor, Last activity) and filters load; Export CSV downloads a .csv whose header starts with "When", "Action", "Advisor"		Not Executed
AP_TC_294	Advisor Portal → Admin	Verify Follow-ups shows its figures and the flag / source / advisor filters	Advisor has administration access.	1. Open Admin → Follow-ups. 2. Observe the stat tiles. 3. Open the flag filter.	N/A	Never Scheduled, Dropped Off, Awaiting Confirmation and Overdue Sessions tiles are shown; the flag filter lists Booking blocked, Can't reach member, Didn't attend, Session overdue, Awaiting confirmation, Never scheduled and Dropped off; the list loads with a "Follow-ups (n)" count.		Not Executed
AP_TC_295	Advisor Portal → Admin	Verify the Advisor notifications console exposes engine/delivery controls and each notification tab; toggles require Save	Advisor has administration access.	1. Open Admin → Notifications. 2. Observe the Engine and Delivery switches, run/send times and channels. 3. Toggle "Push channel" off and on again. 4. Open each tab.	N/A	Engine enabled / run time / timezone, Delivery enabled / default send time, Push and Email channel switches are shown; a Save control appears for changes; the Sessions today, First session, Care backlog, Daily email, Follow-up 1, Follow-up 2 and Escalate to advisor tabs each open.		Not Executed

Testcase ID	Module	Test Scenario	Preconditions	Test steps	Test Data	Expected Result	Actual Result	Status
AP_TC_296	Advisor Portal → Admin	Verify the Administration sidebar links reach every admin page and "Back to main page" leaves the admin area	Advisor has administration access.	1. Open Admin. 2. Click Overview, Advisors, Members, Follow-ups, Departures, Assessment Audit Log and Notifications in turn. 3. Click "Back to main page".	N/A	Each link opens its admin page; Back to main page returns to the workspace.		Not Executed
AP_TC_153	Advisor Portal → Messages	Verify the Communication Center loads delivery stats, channel tabs and the member list	Advisor is logged in with at least one assigned member.	1. Open Communication Center from the sidebar. 2. Observe the stat tiles, channel tabs, search box and member list.	N/A	The Communication Center heading is shown with Emails Sent Today, SMS Sent Today, Delivered and Failed Deliveries tiles, the In-app chat / Email / SMS tabs, a member search box and at least one member entry.		Not Executed
AP_TC_154	Advisor Portal → Messages	Verify the Email and SMS channel tabs switch the member list and empty states	Advisor is on the Communication Center page.	1. Click the "Email" tab and observe the list. 2. Click the "SMS" tab and observe the list. 3. Click "In-app chat" to return.	Channels: In-app chat, Email, SMS	Each tab re-renders the member list for that channel (e.g. "No email sent" / "No SMS sent" per member) and the thread pane shows the channel-specific empty state until a member is selected.		Not Executed
AP_TC_155	Advisor Portal → Messages	Verify selecting a member opens the in-app chat thread with a composer	Advisor is on the Communication Center page (In-app chat tab).	1. Click a member in the list. 2. Observe the thread pane and the member overview panel.	Member: Bruce Banner	The thread pane opens for that member with a "Message..." composer whose Send button is disabled while empty, and the right-hand panel shows the member's details (name, age, contact).		Not Executed
AP_TC_156	Advisor Portal → Messages	NEGATIVE - Verify searching members for an unknown name empties the member list	Advisor is on the Communication Center page with members listed.	1. Type a name that cannot match into "Search members or messages...". 2. Observe the member list.	Search term: "zzzzz-no-such-recipient"	No member entries remain in the list and the page does not error.		Not Executed
